Productivity Made Easy

Intelligent, Versatile Mail Assembly

When it comes to getting a job done, thriving businesses count on reliable tools that add value and streamline business processes. Neopost's Intelligent DS-75i delivers industry-leading productivity by combining unparalleled ease-of-use with intelligent features to assemble a wide variety of mail pieces including direct marketing campaigns, invoices and monthly statements.

The DS-75i can be connected to your network to provide you with access to unique online services such as remote assistance and remote diagnostics to help you reduce downtime and minimize assembly times. With its compact footprint, large loading and unloading capabilities and many intelligent features, the DS-75i fits perfectly into any work environment

Get The Most From Your Mail Assembly System with Output Management Software (OMS)

Output Management Software is an easy, cost effective way to manage your business communications while ensuring the right document is delivered to the intended recipient, every time.

OMS-200 allows you to:

- Automate the creation of optical marks on documents before printing (Optical Mark, 1D and 2D Data Matrix Barcodes)
- Send the right document with the right insert to the right customer in a fast and cost-efficient way
- Automatically handle mail with a variable number of pages to save time
- Merge different documents for the same customer into one envelope to save money on postal costs
- Sort your mail into different batches

Content Control and Security You Can Rely On

Once your documents are prepared and printed, the scanner included with the DS-75i reads all optical marks, then automatically inserts the correct number of pages, along with any marketing or promotional sheets you may have selected, into each envelope.

Utilizing full-page Contact Image Sensor (CIS) scanning technology, the DS-75i can read any type of coding including optical mark, optical character, 1D and 2D data matrix barcodes. Because the scanner reads the entire area of an A4 page, codes can be printed anywhere on the document and can be read horizontally and vertically. This industry-leading scanning capability allows you to add optical marks to your existing documents without affecting your invoicing or payroll applications.

The Complete Document Process

1. High Capacity Vertical Stacker

Holds up to 500 assembled mail pieces and can be unloaded on-the-fly

2. Optical Mark Reading Content Image Sensor (CIS) Scanner

The scanner can read any type of coding printed horizontally or vertically in the document

5. Envelope Feeder

holds up to 325 envelopes and can be reloaded on-the-fly

4. Document Feeders

Process multiple page sets at processing speeds of up to 975 (3 × 325) documents using the 3 standard feeders; all feeders include load-on-the-fly technology, and cascading mode to allow uninterrupted assembly of your mail

3. Load'n Go Automatic Job Set-Up

Start new jobs simply by loading the feeding trays and pressing start

**Graphical user interface with Load'n Go automatic job set-up**

Designed for all users, the intuitive full-color touchscreen provides wizard-based navigation, making it easy for anyone to select and run a job. Have a new job to set up? No problem. With Neopost's exclusive Load'n Go job set-up feature, simply load your documents and envelopes, then press the start button.

The DS-75i will automatically measure the length of your documents and envelopes, then adjust all system settings to assemble your mail.

**Intelligent, continuous document feeding**

The DS-75i comes standard with FlexFeed® feeding technology to allow you to feed and assemble any document size or material type from the same feeding tray. The DS-75i also includes cascade feeding and load-on-the-fly document loading to ensure that mail assembly is uninterrupted, minimizing assembly time.

Maximize loading capacity to optimize your productivity

The high capacity vertical stacker will reduce the frequency of unloading, enabling other tasks to be done in the meantime. It requires less handling and makes it possible to complete up to 500 envelopes every 8 minutes while running at maximum speed.

Specifications

Speed	Up to 3,800/hour
Load'n Go automatic job set-up	Standard
FlexFeed multi-format feeder	Standard
Multiple sheet feeding	Standard
Cascade feeding	Standard
Number of feeders	Up to 3
Job memory	50
Manual feeding	Standard
Document feeder capacity	325 sheets 2.8 oz
Side exit up to 400 C5 envelopes	Optional
Document height	3.5" - 14"
Document width	5" x 9"
Document weight	2 - 8.8 oz
Envelope length	3.5" - 6"
Set thickness	0.01"
Envelope width	6" x 9"
PowerFold folding capacity (one set, single fold)	Standard (up to 10 sheets 2.8 oz)
High capacity document feeder 1200 sheets 80gsm	Optional
Envelope feeder capacity (C5/C6 envelopes)	325
High capacity vertical stacker up to 500 envelopes	Optional

Fold types	Letter, zigzag, single, double parallel, no fold 
------------	--

Mail Quality & Security

Secure'n Feed doubles detection	Standard
Accumulate before folding	Standard
1D and 2D Barcode reader	Standard
Optical Mark Recognition (OMR) reader	Standard
Optical Character Recognition (OCR) reader	Standard
Tip to tip sealing	Standard

Connectivity

LAN embedded	Standard
Wi-Fi embedded	Standard
RemoteAssistance	Yes
Remote Diagnostics	Yes

System Specification

Standard configuration: 3 feeders with catch tray	
Length x Height x Depth	50" x 28" x 20"
Weight	174 lbs
Noise level	66 db

Environmental Commitment

The DS-75i carries Neopost's Eco-Label; our commitment to a clear and consistent set of environmental performance criteria used in the design of our products.

Integrated Service and Support

When it comes to operating and maintaining the productivity tools you've invested in, Neopost is right by your side to keep your communications flowing at a price you can afford.

DocuCare is a selection of service packages for Neopost Mail Assembly Systems. Each package is designed to meet a service standard that you're comfortable with and give you peace of mind knowing that Neopost is the right partner for your business.

We guarantee to keep your mail assembly system operating smoothly and efficiently.

Why Choose Neopost?

Neopost is a world leader in mailing solutions and a major player in digital communications and shipping services.

Our innovative solutions help guide and support organizations in how they send and receive communications and goods, helping them to better connect with their customers.

In today's world of increased dependence on technology, Neopost believes that one thing remains unchanged: the real engine for success is people. Because it's people who drive business forward. Neopost appreciates and nurtures the human side of business and thinks of its customers as individuals, not as organizations.

We believe in creating partnerships based on trust in order to meet customers' changing needs.
